

Technical Bulletin CS-21-01

Sudo Privilege Escalation Vulnerability

This technical bulletin explains the reported vulnerability “sudo privilege escalation” that affects versions of Ubuntu Linux. (CVE-2021-3156)

System Affected

Spectralink CMS

Spectralink AMiE Essentials (SAM)

Spectralink AMiE Advanced Gateway

Description

The identified vulnerability called “sudo privilege escalation” that was announced and assigned the ID CVE-2021-3156 by the Common Vulnerability and Exposures organization has been reviewed by Spectralink. It has been determined that this vulnerability does not affect the Spectralink product lines that utilize the Ubuntu Linux operating system. The required pwpassword preference is disabled by default in our systems. The sudo binary libraries used are the latest and Spectralink has performed rigorous internal testing to ensure compliance and stability.
