# Introducing the Spectralink HDMI Docking Station

The Spectralink HDMI Docking Station expands the capabilities of the Versity 97 Series smartphone. The HDMI Dock lets you connect your Versity 97 to an external monitor, mouse, and keyboard and then interact with it as you would with a PC, using Spectralink's Desktop Mode.

## Get to know the dock

Cradle for Versity 97 handset

Power LED (glows red when connected to power)

### Base length/width

120 × 120 mm  
(4.72 × 4.72 in)

### Maximum height (without phone)

148.84 mm (5.86 in)

# Setting Up the Spectralink HDMI Docking Station

## What's included

- Spectralink HDMI Docking Station
- Spectralink USB-C PD power supply (see **NOTE** below)
- USB cable for the power supply
- Plug adapters for use outside of the U.S.

### NOTE

***Use the provided Spectralink USB-C PD power supply for your dock***

Use the provided Spectralink USB-C PD power supply with your Spectralink HDMI Docking Station.

**Using another power supply may result in poor performance and unexpected behavior, and will void your dock's warranty.**

## What you need to provide

- Versity 97 Series phone running Versity 13.4 or higher
- Monitor with HDMI port (refer to the [Versity 97 HDMI Docking Station Data Sheet](#) for supported resolutions)
- HDMI cable to connect your monitor to the docking station
- Wired USB keyboard, or wireless USB keyboard with appropriate USB dongle
- Wired USB mouse, or wireless USB mouse with appropriate USB dongle

## Connect your peripherals

- 1 Connect your mouse, keyboard, and display to the dock.
- 2 Connect the Spectralink USB-C PD power supply to the dock.
- 3 Plug in the power supply.
- 4 Unlock your phone and insert it in the dock's cradle.

# Working in Desktop Mode

## Features of Desktop Mode

- Spectralink's Desktop Mode lets you interact with your Versity 97 phone as you would with a PC.
- When connected in Desktop Mode, you can still interact with your phone's touchscreen independently of the desktop display
- Apps that don't support landscape orientation (including the Spectralink apps) will open in their own windows in portrait orientation on the monitor
- In apps that support it, app data will transfer automatically when connecting or disconnecting the phone from the dock

## Navigating the desktop

### The taskbar

Connecting your phone to the dock launches Desktop Mode. Apps can be opened and system settings accessed via the taskbar displayed at the bottom of the monitor screen in Desktop Mode.

The left side of the taskbar shows recently used apps, while the right side shows system information including time, date, phone battery level, and network connection strength.

### Launching an app

#### NOTE

***Apps must be enabled by your administrator***

Desktop Mode will only show apps enabled by an administrator. Contact your administrator if you want to use an app that does not appear in Desktop Mode.

Left side detail of the taskbar showing recent apps

Click any app shown among the recently used apps in the taskbar to launch that app.

To launch *any* available app click the (⋮) icon at the far left of the taskbar and select the app in the resulting window.

## Working with app windows

Once an app is launched its window will appear on the desktop. This window can be resized and moved just as you would on a PC: click and drag along the top of the window to move it around on the desktop, and click and drag a window from a bottom corner to resize it.

### More window controls

To make a window open full screen, click the Maximize button  at the upper-right corner of the window. Exit full screen by clicking the same button.

Close a window (and quit its app) by clicking the Close button  at the upper-right corner of the window.

### Back and Home buttons

The Back  and Home  buttons appear beneath the taskbar, either at the center or left of the screen (depending on your monitor's resolution). These buttons function the same as they do on your phone.

## Moving between Desktop Mode and handset operation

### Switching from Desktop Mode to handset operation

When you undock your phone from the docking station, apps you had opened in Desktop Mode will remain open on the handset. All open apps can be found on the phone's Recents screen.

### Switching from handset operation to Desktop Mode

Apps already open on your phone will NOT automatically open on the desktop when you connect the phone to the dock. To open the app on your monitor's desktop, click its app (as described in *Launching an app* above). If supported by the app, once you launch it in Desktop Mode it will open to the same state it was in on the phone.

### Switching an app between handset and Desktop Mode while the phone is docked

If you have an app open on the desktop and then open that app on the handset (while the phone remains docked), the app will move from the desktop to your phone's screen. If supported by the app, it will be in the same state it was in on the desktop.

If you reopen the app on the desktop, it will move from the phone's screen back to the desktop. If supported by the app, it will be in the same state it was in on your phone.

## Using different apps on the handset and in Desktop Mode at the same time

When the phone is docked, you can open apps on the desktop and different apps on the handset and work with them independently.

### NOTE

#### ***Physical vs. on-screen keyboard***

In Android, by default, if a physical keyboard is active (as in Desktop Mode) the phone's on-screen keyboard is not available. Therefore, if you're working with different apps independently on both the desktop and handset at the same time, all keyboard input in both environments must be done using the physical keyboard.

If you'd like your phone's on-screen keyboard to be available even when you're in Desktop Mode, go to **Android Settings > Languages & input > Physical keyboard** and enable **Use on-screen keyboard**.

## Answering or placing a call while the phone is docked

The phone should be removed from the dock to answer or place calls.

## Undocking the phone

To exit Desktop Mode, click the Undock button  in the lower-right corner of the external monitor screen and remove the phone from the dock.

### NOTE

#### ***I forgot to click the Undock button before undocking!***

Phones undocked without clicking the Undock button might not behave as expected – for example, devices managed by an EMM might lock down their screens.

If your phone is not behaving as expected, restarting it will restore normal functionality.

# Regulatory and Safety Information for the Spectralink HDMI Docking Station

## Spectralink HDMI Docking Station

Model Number: ADS9700160

## Product Compatibility

### **CAUTION** ***Product compatibility***

Each Spectralink family of products only works with other members of the same family. If you have any questions about product compatibility, contact your system administrator.

## Do not modify

The user should not make changes or modifications not expressly approved by Spectralink Corporation. Any such changes could void the user's authority to operate the equipment.

### **Ne pas modifier**

L'utilisateur ne doit pas faire de modifications non expressément approuvées par Spectralink Corporation. Tout changement de ce type pourrait annuler l'autorité de l'utilisateur à utiliser l'équipement.

## FCC Compliance Statements

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

### **CAN ICES-003(B) / NMB-003(B)**

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

### **CE Declaration of Conformity with regard to Directives: 2014/35/EU & 2014/30/EU.**

The full text of the EU declaration of conformity is available at the following internet address: <http://support.spectralink.com>.
