NetLink i640 Wireless Telephone
# Quick Reference Guide

System Feature Activation

The features that have been programmed in your system may be viewed and activated through the Shortcut Menu and Softkey Functions.

Shortcut Menu: Press **MENU** while off hook to display the Shortcut Menu. This menu lists the feature description and any associated shortcut key. As you scroll through the features by pressing the **Up** and **Down** buttons, the feature abbreviation is highlighted in the softkey function display area. To activate a feature, you may press its softkey, its shortcut key, or the **Select** button while the option is highlighted. To activate the feature using its shortcut key, press the shortcut key at any time while in the Shortcut Menu. The feature will activate whether or not that feature is currently displayed or highlighted. No shortcut indicates that the feature does not have a shortcut and this is generally the case with primary level softkey functions. To cancel out of the Shortcut Menu and return to the Main display press **MENU**.

Softkey Functions: There are 16 possible features displayed in the four levels of the softkey function display area. Press **FCN** while off hook to scroll to the next level. Repeat as required. Press the corresponding softkey to activate any feature. While scrolling through the softkey functions, a shortcut key may be pressed to activate its feature, whether or not that feature is currently displayed in the softkey function display area.
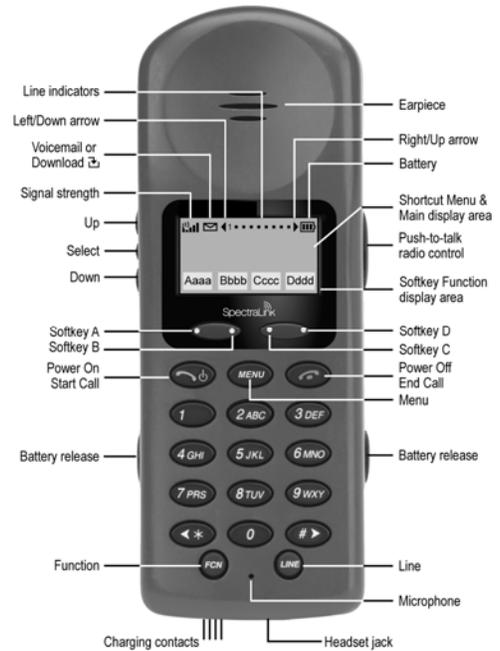

Status/Tone Indicators

The signal strength icon indicates the strength of the signal and can assist the user in determining if the handset is moving out of range.

The voicemail icon indicates that you have a new voicemail message.

No service message An alarm sounds and a descriptive message displays when the Wireless Telephone cannot receive or place calls. You may be outside of the covered area. Walk back into the covered area. The in-service tone indicates service is re-established.

The battery icon indicates the amount of charge remaining in the Battery Pack. The level indications are approximations of the remaining Battery Pack life. They do not indicate equal amounts of Battery Pack Life. When only one level remains, the Battery Pack needs to be charged.

◄ ► ▲ ▼ A left or right arrow is displayed when the screen can be toggled either left or right to display more characters as described above.

Up and down arrows are displayed when the menu has additional options above or below what is shown in the display area.

The download icon displays when the handset is receiving software over the air.

MPORTANT NOTE:

- It is recommended that standard acceptance procedures be followed prior to operating this equipment in proximity of life-support systems.
- To minimize risk of interference, pacemaker users should not carry the Wireless Telephone next to the pacemaker.
- Earpiece may retain magnetic objects.
- Operation of the Wireless Telephone may produce an audible noise noticeable to hearing aid users. It is recommended that a hearing aid compatible headset be used by hearing aid users.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
