Chapter 1: Introduction

The Datamation Unidock Chargers offer a high-density charging capability. UniDock offers 8, 16 and 24 bay charging stations. Spectralink has verified charging of the Versity phones in the Unidock's listed below. Spectralink cannot make any recommendation or support deployments for products not listed.

The Datamation Unidock's have only been evaluated for charging. Unidock provides enough power over USB to charge Versity in less than 4 hours.

The UniDock is based on USB hubs from Cambrionix. Spectralink does not support software/firmware provided by Datamation or Cambrionix. USB data connectivity, while it may work has not been evaluated and is not supported by Spectralink. Versity Software updates via Unidock are not currently supported by Spectralink.

The Unidock must be configured according to Datamation Unidock User Manual for each product listed below. It is necessary to follow the simple adjustment procedure to ensure the alignment of the phones and the USB connector. Spectralink does not warranty damage due to misalignment.

Unidock-8 can only be configured for one Versity series at a time, Versity 95/96 or 92 series, it can't support both at the same time.

Unidock-16 and Unidock-24 can be configured for one Versity series at a time or configured to support both series by having one side configured for Versity 95/96 series and the other side for 92 series.

Spectralink recommends regular cleaning to remove dust, lint and debris from the USB connector in the Unidock and the phone to ensure good electrical connection.

Verified Product Summary

| | |
|---|---|
| Manufacturer | Datamation Systems, Inc: www.ipadcart.com/Unidock |
| Verified products | DS-Unidock-8; DS-Unidock-16; DS-Unidock-24 |
| Cambrionix firmware and PC tools software versions tested | Cambrionix FW v1.79 and v1.83 LiveViewer v2.13.0 for Windows Windows API Version 2.16.5 |
| Smartphone models tested | 9540, 9553, 9640, 9653, 9240, 9253 |
| Handset SW versions tested | Android Oreo (8), Android Q (10) |

Known Limitations

The following limitations were discovered during validation testing of this product

- Configuration of the UniDock to fit the Versity phones is aided by alignment springs on the UniDock-24, the spring helps in setting the proper side tension to ensure easy insertion and removal of the phone. The UniDock 8 and 16 do not have these springs. Take care in alignment and the amount of force applied to the phone to ensure easy insertion and removal of the phones from the dock.
- The UniDock employs Cambrionix USB 2.0 Hubs to distribute power and data connectivity. USB 2.0 supports up to 1.5A per port so Versity rapid charging is not achievable. UniDock will typically charge a Versity phone in <3 hours.
- Data connectivity through UniDock to Versity has been verified but no support is offered by Spectralink. No advanced features are available at this time, such as software updates. Data transfer rate is limited by UniDock to USB2.0 speeds.
- The UniDock Status LED will indicate Charging (Red), fully Charged (Green) and USB to PC connection (Blue), however occasional phone activity may give a false indication. Spectralink recommends checking charging status on the phone to verify the correct status.

Spectralink References

All Spectralink documents are available at <http://support.spectralink.com>.

To go to a specific product page:

Select the Product Category and Product Type from the dropdown lists and then select the product from the next page. All resources for that particular product are displayed by default under the All tab. Documents, downloads and other resources are sorted by the date they were created so the most recently created resource is at the top of the list. You can further sort the list by the tabs across the top of the list to find exactly what you are looking for. Click the title to open the link.

Support Documents

There are no additional support documents for Datamation Unidock at this time.
